RAKO – The allrounder in Euro dimensions

One for all

The RAKO is a universal plastic container that can be used for all conceivable requirements. In spite of many base variants, which also enable use on automatic conveyor systems, the RAKO is often chosen when manual handling is required. This makes the RAKO a typical storage and transport container. If someone in Switzerland is looking for a plastic storage box, he or she will ask for a RAKO.

The name RAKO stands for the technical construction of the container: four corner columns, in connection with the upper U-shaped, circumferential rim and a base with circumferential rib give the container an extremely stable frame. RAKO therefore stands for frame construction, a name that symbolically describes the load-bearing capacity of the plastic box.

There are about 350 variants of the RAKO, a plastic container with greater flexibility is hardly imaginable. On the following pages you can search and find your special RAKO for storage or transport, in the company or on the way to your customers.

Versatile and flexible

The basic euro container RAKO enables a large number of variations by combining various sidewalls, bases and handles.

When selecting the perfect container, you can choose between solid, perforated and slotted sidewalls, a solid, grated or ribbed base, depending on its purpose and stress level insert an enclosed double base and decide between a profile handle, handle slots or shell handles.

These versatile selection options in combination with the euro container's high load capacity are what make the RAKO an extremely adjustable universal container.

RAKO suitable for Euro pallets and ISO pallets

RAKO containers can be stacked onto pallets for storage or transport. This is why the base size of the containers must be aligned to the base size of the pallets. The RAKO containers can be stacked both on Euro pallets and on ISO pallets. The illustrations show how this works.

ISO pallet 1200 x 1000 mm

RAKO
600 x 400 mm

RAKO
400 x 300 mm

Euro pallet 1200 x 800 mm

RAKO
800 x 600 mm

RAKO
600 x 400 mm

RAKO
600 x 200 mm

RAKO
400 x 400 mm

RAKO
400 x 300 mm

RAKO
300 x 200 mm

RAKO
200 x 150 mm

Base variations

Bases for normal surface loading

* The SGL floor enables a compound stacking. This means that a 600 x 400 mm container can be placed on two RAKO 400 x 300 mm.

Accessories

Identification

- Barcode(frame)
 - Transponder/RFID-Chips
 - Inmould label
- Can be positioned individually

Label pockets

- With borders on 2 or 3 sides
- For welding on or gluing on

Individual marking

- Hot stamping
 - Pad printing
 - Thermotransfer printing
 - Script inserts
 - Inmould labelling
 - Foil embossing
- For individual models a template is required

Special RAKO

4-10

RAKO as tray container

Model

On request, RAKO containers can be equipped as tray containers.

RAKO inspecial dimensions

Model

On request, RAKO containers can be manufactured in various special sizes starting from small series.

RAKO electrically conductive ESD

Model

refer to chapter „Electrically conductive products ESD“

RAKO 800 x 600 mm welded to pallet

Model

On request, RAKO containers 800 x 600 mm can be welded to a half-pallet. This allows the RAKO containers to be easily transported by forklift.
