Cross-stackable Transport Dolly 600 x 400 mm

[utzgroup.com](https://www.utzgroup.com)

More safety and higher comfort

- For stacking, the dollies are rotated by 90° and nested into one another. Never before could dollies be stacked that simple, compact, space-saving and secure.
- Simple and quick stacking, not on the casters but on the specially designed and patented frame.
- No additional stacking aids like grids or frames required.
- Castor diameter Ø 100 mm for low rolling resistance and more safety for ledges and edges.
- One castor with locking brake as standard.
- High safety rim for better fixing of the materials loaded.
- Manufactured in Switzerland.

External dimensions:	615 x 415 x 140 mm
Internal dimensions:	607 x 407 mm
Height of safety edge:	20 mm
Weight:	2.9 kg
Loading capacity:	200 kg
Standard colour:	dark blue

Far-reaching compatibility

- With the enlarged internal dimension of the support (607 x 407 mm), the dolly is compatible for any containers with Euro standard dimensions.

Dolly with rubber tyres

Variants and options

- Choose from two different castor variants:
 1. Rubber tyres: ideal for inside and outside and for uneven surfaces, very smooth running and low-noise.
 2. Polyamide wheel and stainless-steel INOX version of metal parts: suitable for plant-internal use in the food, pharmaceuticals and chemicals industries. Resistant against most acids, bases, oils, greases and cleaning agents. Especially for use in moist and wet areas.
- Various colours may be produced from a minimum quantity of 250 pieces upwards:

Dolly with polyamid wheels, 100% rust-free.

Order no.	Model	Castors
80-50-20.1	Plastic ABS	4 steering castors with rubber tyres, Ø 100 mm, 1 with locking brake
80-50-70.1 INOX	Plastic ABS stainless-steel	4 steering castors with polyamide wheels Ø 100 mm, 1 with locking brake

Dolly patented.
